I am a backend engineer with years of active experience as an individual and as a team member in designing, developing, testing, deploying and maintaining scalable software applications that ensures user's satisfaction. I am adept in using JavaScript, Node.js (Express.js), Python, Django, FastAPI, MondoDB, MySQL, PostgreSQL, Firebase, AWS, and HTML/CSS to build digital products that solves it's intended problems and satisfy its users.

## Education

### ● Imo State University

*Graduated in 2022*

- Bachelor of Engineering, Electrical and Electronic Engineering (Tele-communications and Software.)

## Skills

- Web and Mobile App development
- JavaScript/Typescript
- Node.js (Express.js)
- Python (Django, FastAPI)
- MongoDB
- PostgreSQL
- MySQL
- Firebase
- Cloud (AWS, GCP, Ms Azure, Clouflare)
- GitHub, Postman
- System Design
- CI/CD Pipelines

## Experience

### ● Adminting INC. - Backend Engineer

*2022 - Present*

- Collaborated with a team of product designers, frontend developers, QA Engineers, and DevOps Engineers to bring the company's digital ideas and solutions into reality.
- Created system designs and wrote maintainable codes on the server-side of web and mobile applications based on the product's requirements.
- Created efficient and secured REST APIs with JWT (JSON Web Tokens) for consumption on the frontend applications based on the product's UI/UX designs.
- Made contributions to product designs to ensure efficient data interaction on the client-side application. This was done in an Agile Development Methodology.

### Hospyta - Backend Engineer

*2021 - 2022*

- Created server-side applications with API endpoints and connected them to database collections which has models and schemas that I also created, pushed the codes to a test environment and moved them to a team workspace in Postman for testing.
- Developed scalable backend application that allows for CI/CD (Continuous Integration and Continuous Development).
- Integrated all required middleware that would ensure application security and I also created GitHub pull requests after every integration.
- I led a team of junior backend developers by guiding them through the entire development process, reviewing their codes, supervising version control, and preparing codes for production environment.

### SKILLTECH INC. - Fullstack developer

*2019 - 2021*

- Deployed clients web and mobile application to the required cloud sever after the product managers has approved the code of passing all required test cases.
- Used modern and efficient technologies to develop and optimize applications for performance, security, and future maintenance.
- I was personally selected by my company to completely handle the development of a government educational website application and its student's portal for my State Government's project (SKILLUPIMO), which was coordinated by my State's ministry of digital economy and E-government. This portal lately had up to 350,000 active students and an average of 30,000 users per hour.
- Maintained existing fullstack applications and also integrated new features to match the needs of clients business based on their industry standards.

## Awards

Most productive Software Engineer - SKILLTECH INC. (April 2020)

Best problem solver - Hospyta (Feb. 2022)
